

# Grow your own pea shoots

## Science Experiment

### Method

1. Soak the peas in water for 24 hours  
*(you can use supermarket peas)*
2. Select a container. 6 -9 cm deep roughly  
*(practise your measuring skills too)*
3. Fill container and add water
4. Cover your container
5. Check daily and water
6. Harvest and enjoy!
7. Don't forget to recycle your compost!

### You will need:

- Supermarket peas
- A container
- Compost
